Degree	Institute	Year	CPI/%
B.E (EEE)	UVCE, Bengaluru	2017-2021	75 %
HSC	Shantiniketan PU College	2015-2017	89.0 %
SSC	Adarsha Vidyalaya	2010-2015	94.88 %

SUMMARY

With over 3.5 years of experience as a Java backend developer specializing in Spring Boot, Hibernate (JPA), Multithreading, RDBMS, and Spring Security, I excel at crafting robust and scalable solutions. Seeking to leverage my skills to contribute effectively to innovative development projects.

PROFESSIONAL EXPERIENCE

Software Development Engineer | M2P Fintech   May 2021 - Present

- Key member of the core LMS team responsible for a system that generates 70% of company revenue.
- Contributed to the development of products such as Buy Now, Pay Later (BNPL) solutions and gold loan services as part of a dedicated team.
- Developed features including loan returns, loan restructuring, part payment, pre-closure, among others, successfully reducing processing times by 30%.
- Designed database schema from software requirements specification excel by identifying entities, defining relationships, and considering data integrity, normalizing to avoid redundancy, leading to a 25% improvement in database performance.
- Implemented Restful Web service API by imbibing Solid principles with proper error handling validation, achieving a 15% reduction in bug frequency.
- Led a team of four through multiple sprints to tackle production issues, enhancing system stability and client satisfaction, evidenced by a 40% decrease in reported bugs.
- Collaborated with clients for requirement gathering and conducted multiple demos, ensuring smooth user experience and achieving a client satisfaction score of 95%.
- Trained 5 interns and junior SDEs, improving their code quality by 40% through PR reviews and feature design oversight.

TECHNICAL SKILLS

- **Languages:** Java, SQL.
- **Frameworks:** Spring Boot, Hibernate/JPA, Spring Security, Kafka.
- **Skills:** Multithreading , RESTful API, Data Structure and Algorithms.
- **Tools:** Git, STS, Visual Studio Code, Docker.

PROJECTS

Sejaya(A Srilankan NBFC) | Spring Boot, MySQL, REST APIs, ActiveMQ   (Feb 2022)

- Developed robust RESTful APIs, incorporating asynchronous processing using ActiveMQ, enhancing feature performance by 25%.
- Delivered a high-quality product with minimal bugs, demonstrating strong attention to detail and effective problem-solving skills.

Kotak Flipkart (BNPL Product) | Spring Boot, MySQL, REST APIs   (Mar 2023)

- Managed project lifecycle from requirements gathering to RESTful API development for features like payin, payout, billing, and returns.
- Conducted code reviews and mentored junior developers, ensuring on-time delivery with 20% fewer bugs.

HDFC Credila | Spring Boot, MySQL, REST APIs   (Apr 2024)

- Oversaw requirements analysis and RESTful API creation, integrating LMS features like loan restructuring and part payment.
- Improved system stability by 30% through effective collaboration and issue resolution.
